Talk to a licensed tax preparer and they can help you better understand what it all means. Imagine if all the national and local parks were privatized. The government forces employers to withhold (or charge, as you put it) taxes on their employees' earnings by threatening fines and even jail time for not doing so (or to reclassify them as independent contractors in order to avoid withholding and matching requirements). The tax is the only way governments make money and use that money to preserve for their constituency. You can upgrade your W-4 at any time with your employer and you might want to when your family size changes. W-4 forms are completed by employees to ensure that the appropriate amount of pay is withheld (and transferred on their behalf) by their employers to the government. W-2 forms are needed for people when they deposit their taxes on personal income, so they can calculate whether they are under or overpaid. Who would have paid to defend us? The W-2 also details the amount of pay a person was sent to the government to fund their Social Security and Medicare accounts. Imagine how devastating a pandemic would be without the Center for Disease Control to monitor and mitigate disease outbreaks. But still, some people believe that taxation is illegal, unjustified and wrong. All expensive, right? Same with your education or your children's. They believe that free market forces should fund the military, the Coast Guard, the Department of Defense, the veterans, the Border Patrol, the FBI, the CIA, DEA, FDA, USDA, USPS, the Federal Prison Complex, the National Park Service, the Interstate Highway System, air traffic and justice (only to name a few things). What about the military, border control and veterans? Well, what if we had to pay to fight the private fire? Visiting one would cost as much or more than going to Disneyland. If you fill out any or no, employers withhold taxes because they don't want to get fined or go to jail. Now the meta-question in the question is how can the government tax the income of its citizens? I bet people who live pay-for-pay would have a hard time finding extra money to pay the army, when they're already spending so much on teachers, schools, health care, local emergency response, food safety inspections, social workers, criminal justice system, road repair and construction, inspection and maintenance of bridges, and remediation of natural disasters (to name but a few). Private colleges? If you spend more than three months without paying taxes when you make money à if your employer keeps it and pays it on your behalf or if you just made the money and no one has collected the taxes for you à you will be fined and charged interest on your late tax payments. Without funds, no federal, state, or provincial programs, or employees, would exist. So let me review my answer a little. It's not your employer that makes you pay your taxes, it's the government. (Rhymes!) ** END OF UPDATE** W-9 forms are what you fill out to verify your identification, or citizenship status, for your employers. How much of each salary are you willing to pay directly to the Department of Defense and Veteran Affairs? Do you also pay for private childcare? If you do not fill out a W-4 then your employer withholds the standard amount for a single person. We like to complain and complain, but taxes aren't just for the public good, they're for our own. We all take for granted the myriad benefits we get from paying taxes. BUT, I'm thinking I've lost the underlying concern of the characteristic with my response.
